FBI Statement on the Parkland, Florida, Shooting

On January 5, 2018, a person close to Nikolas Cruz contacted the FBI's Public Access Line (PAL) tipline to report concerns about him. The caller provided information about Cruz's gun ownership, desire to kill people, erratic behavior, and disturbing social media posts, as well as the potential of him conducting a school shooting.

Under established protocols, the information provided by the caller should have been assessed as a potential threat to life. The information then should have been forwarded to the FBI Miami field office, where appropriate investigative steps would have been taken.

We have determined that these protocols were not followed for the information received by the PAL on January 5. The information was not provided to the Miami field office, and no further investigation was conducted at that time.

FBI Director Christopher Wray said:

"We are still investigating the facts. I am committed to getting to the bottom of what happened in this particular matter, as well as reviewing our processes for responding to information that we receive from the public. It's up to all Americans to be vigilant, and when members of the public contact us with concerns, we must act properly and quickly."

We have spoken with victims and families, and deeply regret the additional pain this causes all those affected by this horrific tragedy. All of the men and women of the FBI are dedicated to keeping the American people safe, and are relentlessly committed to improving all that we do and how we do it."

The 2nd Amendment

A well regulated militia being necessary to the security of a free state, the right of the people to keep and bear arms shall not be infringed.

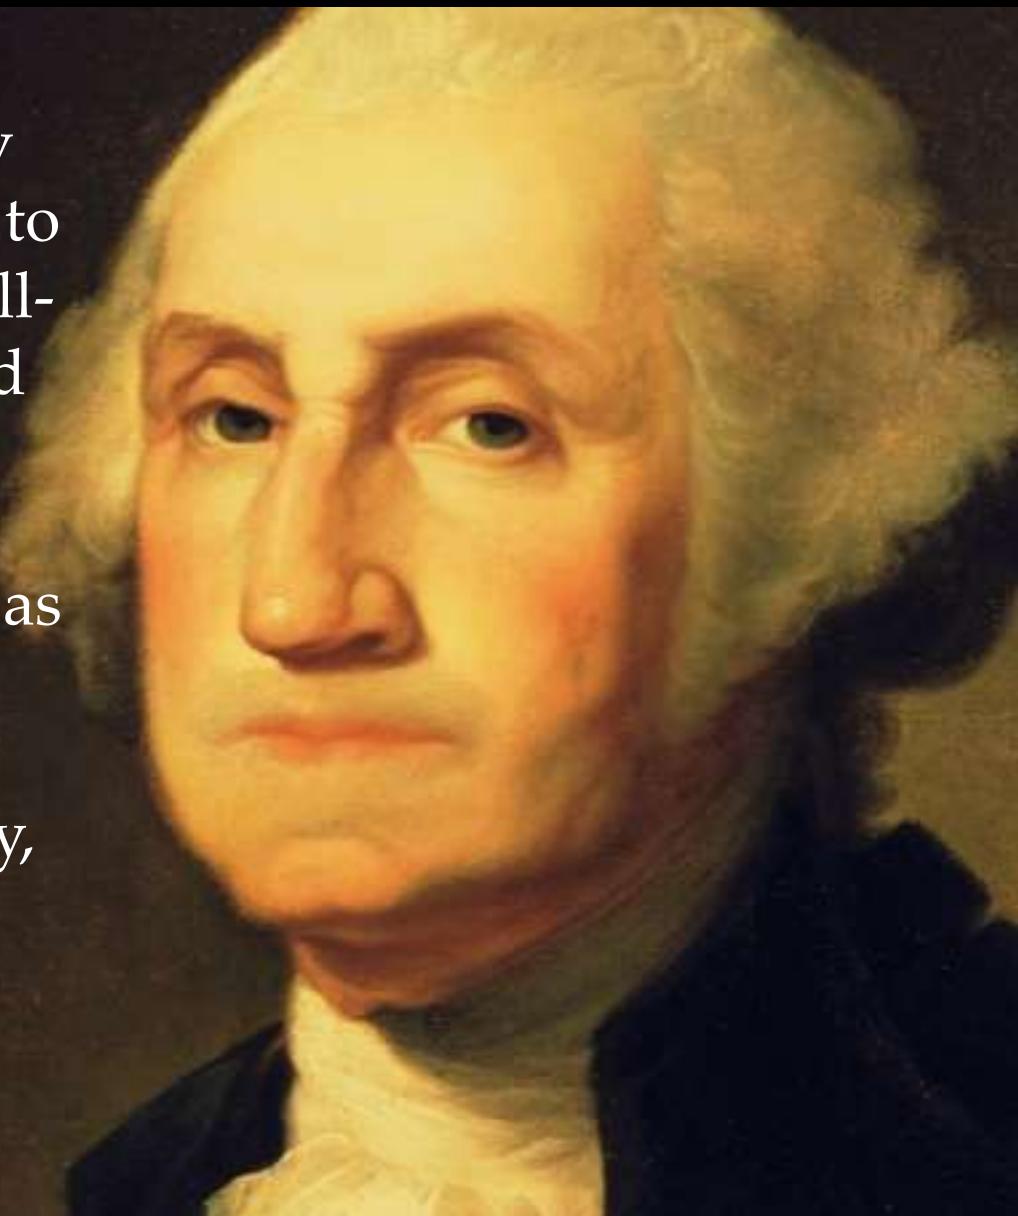

"The right of the people to keep and bear arms shall not be infringed. A well regulated militia, composed of the body of the people, trained to arms, is the best and most natural defense of a free country."

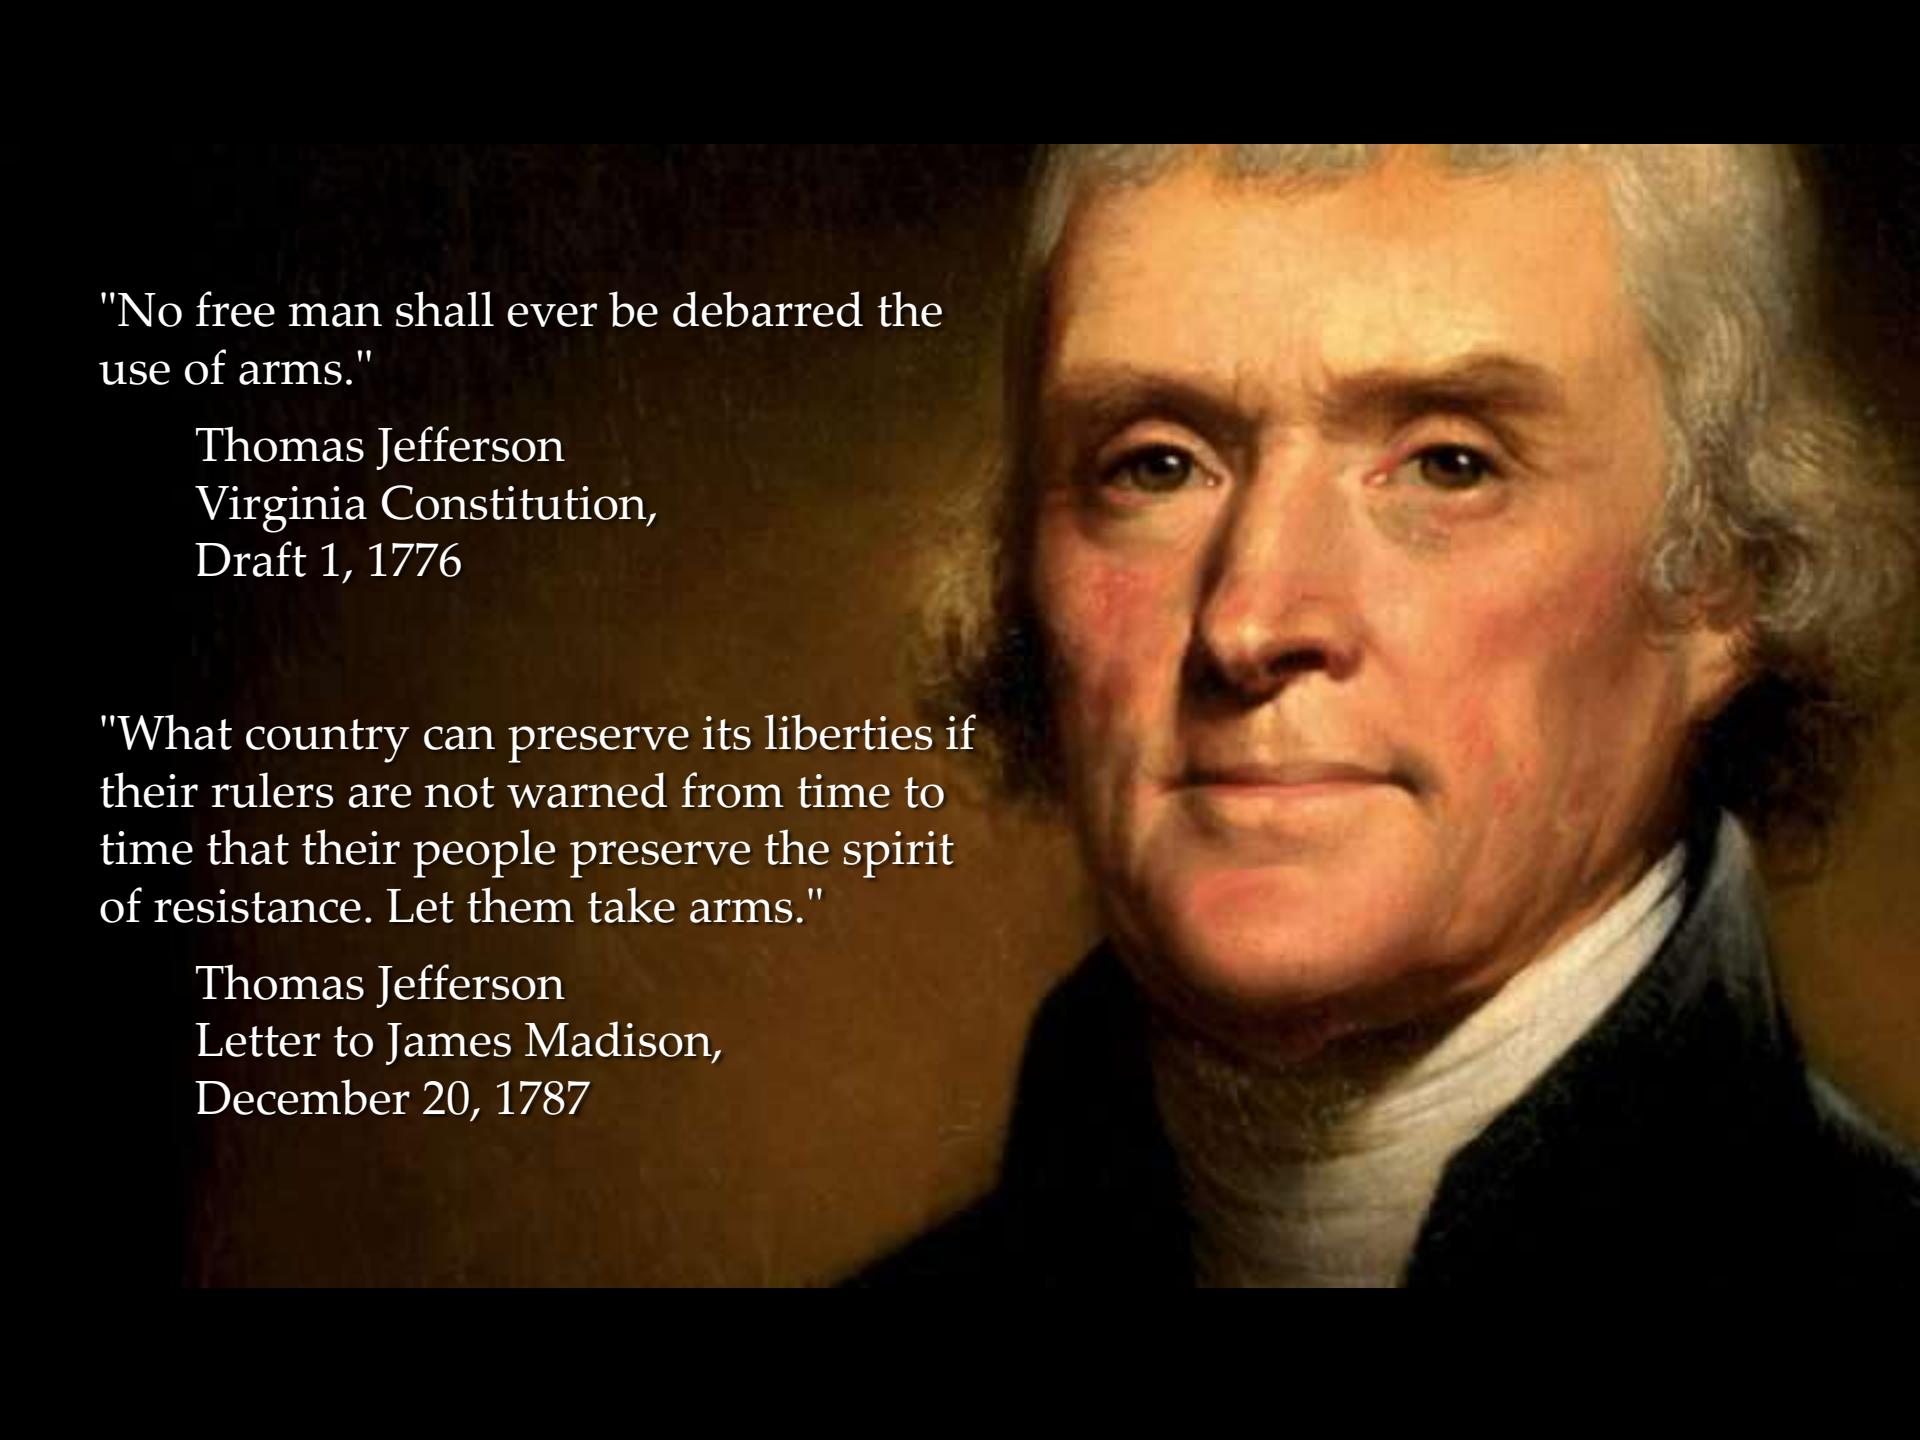

James Madison
I Annals of Congress 434
June 8, 1789

"A free people ought not only to be armed, but disciplined; to which end a uniform and well-digested plan is requisite; and their safety and interest require that they should promote such manufactories as tend to render them independent of others for essential, particularly military, supplies."

First State of the Union

He is shown from the chest up, wearing a dark green velvet jacket over a white cravat and a white high-collared shirt. His hair is powdered and powdered white. He has a serious, contemplative expression, looking slightly to the right of the viewer. The lighting is dramatic, with strong highlights on his forehead, nose, and cheekbones, while the background is dark and indistinct.

"No free man shall ever be debarred the use of arms."

Thomas Jefferson
Virginia Constitution,
Draft 1, 1776

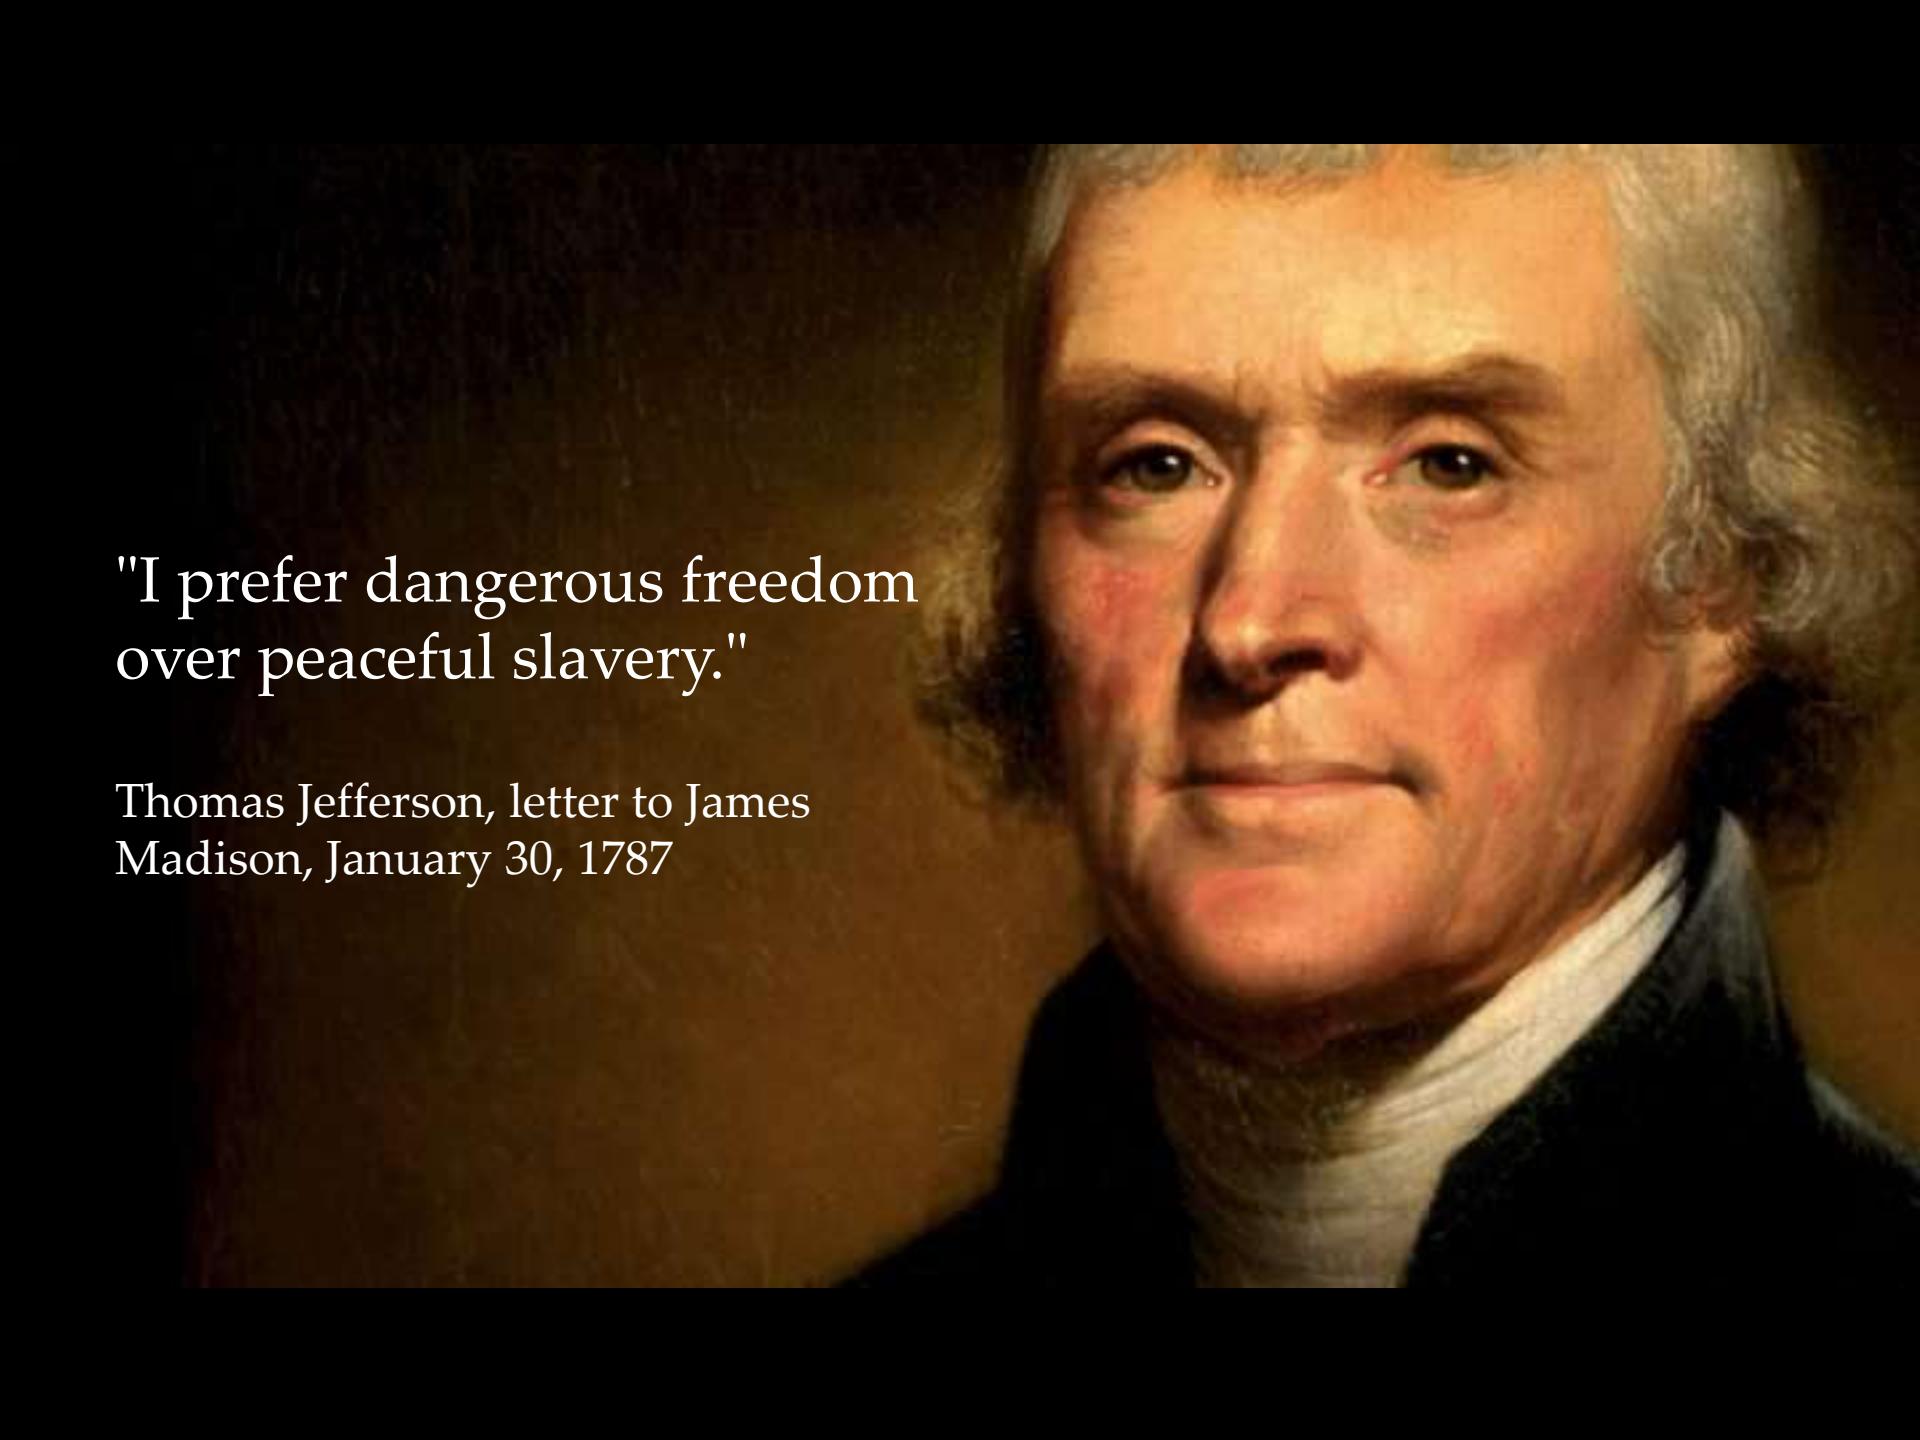

"What country can preserve its liberties if their rulers are not warned from time to time that their people preserve the spirit of resistance. Let them take arms."

Thomas Jefferson
Letter to James Madison,
December 20, 1787

"The laws that forbid the carrying of arms are laws of such a nature. They disarm only those who are neither inclined nor determined to commit crimes.... Such laws make things worse for the assaulted and better for the assailants; they serve rather to encourage than to prevent homicides, for an unarmed man may be attacked with greater confidence than an armed man."

century criminologist Cesare
Beccaria), 1774-1776

Fact Sheet: Gun Violence

In the wake of the tragic murder of 17 innocent students and teachers at Marjory Stoneman Douglas High School in Parkland, Florida, students, educators, politicians, and activists are searching for solutions to prevent future school shootings. As emotions morph from grief to anger to resolve, it is vitally important to supply facts so that policymakers and professionals can fashion solutions based on objective data rather than well-intended but misguided emotional fixes. Are there ways to reduce gun violence and school shootings? Yes, but only after objectively assessing the facts and working collaboratively to fashion common-sense solutions.

Eight Stubborn Facts Regarding Gun Violence in America

1. Violent crime is down and has been on the decline for decades.
2. The principal public safety concerns with respect to guns are suicides and illegally owned handguns, not mass shootings.
3. A small number of factors significantly increase the likelihood that a person will be a victim of a gun-related homicide.
4. Gun-related murders are carried out by a predictable pool of people.
5. Higher rates of gun ownership are not associated with higher rates of violent crime.

6. There is no clear relationship between strict gun control legislation and homicide or violent crime rates.
7. Legally owned firearms are used for lawful purposes much more often than they are used to commit crimes or suicide.
8. Concealed carry permit holders are not the problem, but they may be part of the solution.

1. America is relatively safe, and the trend is toward becoming safer.

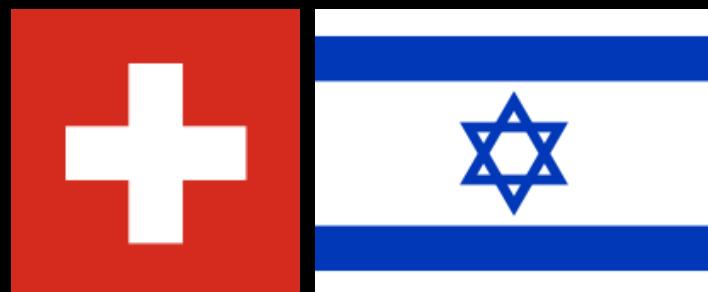

- According to the National Crime Victimization Survey, violent crime has been [declining steadily](#) since the early 1990s.
- The 2011 homicide rate was [almost half](#) of the rate in 1991, and according to Pew Research, the 2013 gun-related death rate was [half](#) of the rate in 1993.
- The number of non-fatal firearm crimes committed in 2011 was [one-sixth the number](#) committed in 1993.
- In the past few years, there have been minor increases in certain types of violent crimes, mainly in large metropolitan areas. However, these increases are nowhere near [those seen in the 1990s](#) and are largely related to [gang activity](#).
- It should be remembered that it takes at least three to five years of data to show true trend lines. It appears that the collective homicide toll for America's 50 largest cities [decreased modestly](#) in 2017 after two consecutive years of increases.
